Education

University of Chicago

Ph.D. student in Statistics, Advisor: Prof. Nathan Srebro

2018 – Present

B.S. in Applied Mathematics

B.S. in Statistics

2015 – 2018

Selected Coursework

Machine learning:

- Natural Language Processing, Deep Generative Models, Robot Learning and Estimation, Statistical and Computational Learning Theory

Statistical inference:

- Generalized Linear Model, Time Series Analysis, High Dimensional Statistics, Robust and Semiparametric Statistics, Nonparametric Statistics, Multiple testing and Modern Inference, Measure Theoretical Probability, Topic in Random Matrix theory

Research

I am interested in the statistical foundation of machine learning. With the hope of bridging the gap between the classical statistical learning theory with modern practices in data science, I have been trying to understand how over-parameterized models that memorize the training data (such as a deep neural network) can generalize to unseen data through the prism of **implicit regularization** and **uniform convergence**.

Publications

Uniform Convergence of Interpolators: Gaussian Width, Norm Bounds and Benign Overfitting

with Frederic Koehler, Danica J. Sutherland and Nathan Srebro

- under review at *Conference on Neural Information Processing Systems (NeurIPS) 2021*

On Uniform Convergence and Low-Norm Interpolation Learning

with Danica J. Sutherland and Nathan Srebro

- published at *Conference on Neural Information Processing Systems (NeurIPS) 2020*
- Spotlight (top 2.9% of submissions)

Consulting

Participated in statistical consulting program that offers advice on data analysis to researchers from other departments within the university:

- *Higher-order-thinking talk (HOTT) in parent-child interaction*, Fall 2019
- *Medication discrepancies and blood pressure control in Botswana hypertension clinics*, Winter 2019

Teaching

- Introduction to Random Matrices (Winter 2021)
- Statistical Theory and Methods (Autumn 2020, Autumn 2019 & Winter 2019)
- Convex Optimization (Winter 2020)
- Optimization (Spring 2019)

Skills

- Programming: R, Python, MATLAB, \LaTeX
- Language: English, Chinese Mandarin, Cantonese, Teochew dialect
